COLTON, O., Aug. 5th. A very pleasant surprise party was given to Mrs. N. DeBree and daughter Jeanette and Mrs. J. P. McFarlin by their Colton friends last week. The roads were blockaded with buggies and wagons and a special wagon brought the refreshments which were served about midnight. Dancing and music were on the program. A large crowd was present, and a good time was enjoyed by all.

What can be termed an outrage was perpetrated by the Barr family who reside in Washington township. This family moved here from Ft. Wayne about two years ago, one of the boys being married to a fine and accomplished lady of that place. This lady has made hosts of warm friends here but she has found that married life is not all sunshine. Last Saturday the husband worked up a scheme by which he intended to get rid of his wife. He promised to take her back to visit her old home Ft. Wayne. He purchased a ticket for her to that place and one for himself to Napoleon. While nearing Napoleon the husband made an excuse to go into the smoking car and as soon as the train stopped he dropped off and took the next one back home. The lady soon discovered the desertion and instead of going on as was expected she returned to Colton also. We have not heard the outcome, but public

#### QUEER ANSWERS.

They Came From Children of the City of

Since wit has been defined by Noah Webster as "the felicitous association of objects not usually connected so as to produce a pleasant surprise," may not the pupils of some of Boston's public schools, who gave the following answers to their examination questions, lay claim to it? The record as here given is bona fide, having been read during the graduation exercises of one of the leading

grammar schools of this city: First.—Who were the pilgrims? A dirty, filthy set who lived under the Salt. Fine Table per sack ...... 5, 10@25 ground.

Second.-Name a domestic animal useful for clothing and describe its habits? The ox. He don't have any habits because he lives in a stable. Third.-If you were traveling across

the desert, where would you choose to Fourth. - Mention five races of men. Men, women, children and babies. Fifth. - Describe the white race and show that it is superior to the other races. A white man wild nod at you

when he meets you on the street. Sixth.-Of what is the surface of the earth composed? Dirt and people. Seventh.—Name a fruit that has its seeds on the cutside. A seed cake,

Eighth.-Name five forms of water. Hot water, cold water, fancet water, well water and ice water... Ninth.-Name and locate the five senses. The eyes are in the northern

southern. Tenth.-Who were the mound builders? History cannot answer these ques-

tions. Science only can. Eleventh. - Define flinch and use it in a sentence. Flinch, to shrink. Flan-Twelfth,-By what is the earth sur-

rounded, and by what is it lighted? It is surrounded by water and lighted by gas and electricity. Thirteenth.-Name six animals of

the arctic zone. Three polar bears and three scals. Fourteenth.-What is yeast? Yeast is a vegetable flying about in the air and hitching itself on to anything.

president a head. Seventeenth. -What are the last teeth that come to man? False teeth. -Boston Budget

### The Cross.

A letter from W. F. Carman says: In your paper I find mention of a rich find at Dashur, where relies embellished with the cross were found. Some doubt has existed as to relics bearing the cross being genuine antiques. I have in my possession a relic from Nineveh clutched from destruction by my own hand while excavating a chamber in the southwest angle of northwest palace of Nimrod,

one of the most ancient or Nineveh. This relie cannot be less than 3,000 years old. It has upon the upper surface the Maltese cross and is surrounded by buds of some flower. It is a lamp of hard baked clay similar in material to the cylinders whereon is recorded the history of the time. Its antiquity, however, has been doubted because it bears a cross. I can prove that the most ancient relics found both at Nineveh and Babylon have the cross as the most ancient Lulu Parker, of Fostoria, came emblem of the sun. It is seen on the Thursday to spend a couple weeks necklace of the king and on the rock sculperes of Bavian and elsewhere in the rains of Nineveh and vicinity .-

Philadelphia Record. A New Race of Roses Perpetual. The Gardeners' Chronicle calls attention to a new race of roses which has been introduced by some Paris growers. They belong to the Polyantha groupthat is to say, they bear their flowers in trusses. The new roses have the advantage over the others of being "perpetnal," and consequently they flower continnously all through the summer. This advantage they owe to their origin, a natural cross (croisement naturel), observed in the Lyons gardens, between the flowers of the first specimens of Polyantha introduced from Japan and week from a visit with relatives in some hybrid perpetual roses. By repeated and careful selections, a new race of roses has been produced which, like an-S. Eastley and F. Leache, of Jewel, mals perminate flower, and produce DESTRUCTION OF

seeds in less than a year. The term 'dwarf'' is justified by the height, which in adult plants is only about 20 inches. The flowers are single, semidouble or double, in almost equal proportion, and present almost all the variations of color observed in cultivated roses. Flowering commences in the first year, and even interesting features of this new type.-Westminster Gazette.
